Abstract (en)

[origin: EP0546201A1] The drawer guide has guide rails (20) for guiding the drawer. In order that the drawer has a short installation depth, swivel arms (23) are provided at the rear end of the drawer, which run with running rollers (25) in the guide rails (20), are swivelled inwards at the rear end of the insertion movement, and are folded against the rear wall (14) of the drawer. To retain the swivel arms (23) in the stretched state, locking elements (31, 32) are provided on the drawer and on the swivel arms, which locking elements engage in one another as a function of the load. The locking elements are retained in the extended state by the weight of the projecting drawer. <IMAGE>
