Abstract (en)

Disclosed is a pressing machine for working a material by a top tool secured to a slide unit connected via a con'rod to a crank shaft and by a bottom tool secured to a bolster. The pressing machine includes a slide unit (12) connected via a con'rod (10) to an eccentric unit (9) of a crank shaft (8); slide horizontal position adjusting devices (42), so mounted on a frame of the pressing machine as to confront respective slide members of the slide unit (12) in the horizontal direction, for adjusting positions of the respective members of the slide unit (12); and a slide lifter (11), provided between the slide unit (12) and the con'rod (10), for making the slide unit (12) ascendable and descendable with respect to the con'rod. <IMAGE>
