Abstract (en)

[origin: EP0546945A1] The anti-theft switch includes a support (1) with a bottom (3), and housed inside the support, a rotor, at least one rotary wiper linked rotationally to the rotor, and moving contacts integral with the wiper for cooperation with fixed contacts (8, 9) carried by the bottom, in which the bottom has a connector part (30) into which emerge power supply parts (100, 101, 200, 201, 301, 302) and in which the fixed contacts are arranged as two coaxial annular electrical tracks. The said connector part extends perpendicular to the rotor, a rotary wiper with moving contacts is associated with each track, the bottom is moulded over the parts for attachment of the fixed contacts while leaving the said fixed contacts bare, the said supply parts are laid out as at least two conductive plies mounted axially one above the other. <IMAGE>
