Abstract (en)  
The plates (7) in this heat exchanger form a first assembly of passages (8A) serving to exchange heat and a second assembly of passages (8B) which are, for at least part of their extent, connected for exchange of heat with the first assembly of passages (8A) to a reduced extent or almost not at all. The second assembly is designed to fulfil an associated function with the heat exchanger, particularly a function of storage of liquid and/or recirculation of liquid and/or the separation of liquid and vapour. Application to cryogenic heat exchangers. <IMAGE>

Abstract (fr)  
Les plaques (7) de cet échangeur de chaleur délimitent un premier ensemble de passages (8A) servant à l'échange thermique, et un second ensemble de passages (8B) qui se trouvent, sur au moins une partie de leur étendue, en relation d'échange thermique réduite ou à peu près nulle avec les passages (8A) dudit premier ensemble et sont agencés pour remplir une fonction annexe de l'échangeur de chaleur, notamment une fonction de stockage de liquide et/ou de recirculation de liquide et/ou de séparation liquide/vapeur. Application aux échangeurs de chaleur cryogéniques. <IMAGE>
