Abstract (en)

[origin: EP0548758A1] In a process for continuous or discontinuous manufacture of boards, a flat web (15) of chips, fibres or similar particles, which contain lignocellulose and/or cellulose treated with at least one added binder, is formed on a transport surface (11), wetted with a water/binder mixture (20) with a heat-curing binder and a reaction-accelerating component in the form of a mist immediately before pressing and then pressed under the action of heat between two pressing surfaces to give a board(14). <IMAGE>
