Abstract (en)
A panel for a curtain wall panelling system comprises two pans 22,24 having inturned marginal flanges. The marginal flange 52 of the first pan 22 has a laterally projecting edge portion 58. This is engaged against abutment 60 of intermediate rigidifying profiles 28,30 positioned between two adjacent panels. The abutments 60 retain the pan 22 against movement, the profiles 28,30 being secured by a fastener 18 against the support structure 10. <IMAGE>
