Abstract (en)

[origin: EP0549501A1] The block has the general shape of a hollow rectangular parallelepiped comprising two vertical side walls (3) and a central part (2) connected to the walls (3) by transverse divisions (4); this central part (2) comprises, in its upper part, a horizontal platform (20) and in its lower part tongue-shaped units (21) capable of being inserted by their free ends into a binder (8), such as mortar, placed on the platform of the block below, without coming into contact with this platform, the bearing of the two courses of blocks being achieved by the edges (30, 31) of the side walls (3) without exposed joints. Construction of walls. <IMAGE>
