Abstract (en)

[origin: EP0549546A1] To deposit and withdraw valuables, a safe is used, comprising: - a drum (1) equipped with a plurality of compartments (2) arranged as spokes and intended for receiving the valuables, which drum is mounted loosely on a horizontal shaft (3); - means for driving the valuables-carrying drum (1); - electromechanical means (5) for the respective blocking and unblocking of the drum (1), which respectively prevent and allow the rotation of the drum in one or in both possible directions of rotation; - a time delay for activating the said electromechanical means (5), which is controlled by a counter operator by means of pushbuttons (11, 13, 14); - an armoured exterior housing (6) provided with an orifice (7) for inserting or extracting the valuables, which is equipped with an opening front door (20) to allow access to the inside of the safe; - means (9) for respectively opening and closing the front door (20); - an electronic key (16) for activating the safe; - an electronic key (15) for unblocking the means for opening the front door (20) of the housing (6). <IMAGE>
