Abstract (en)
The prefabricated component (1) for building staircases comprises a supporting element (2) made of foamed plastic material which extends longitudinally and is cut in the shape of steps (3) along one of its upper surfaces. The supporting element is provided with a plurality of longitudinal holes (7) which are meant for the insertion of respective metallic reinforcement frames (8,9) and are suitable to be filled with a concrete casting when installed, to provide respective beams for stiffening the supporting element. <IMAGE>
