Abstract (en)
[origin: EP0550384A1] Antiglare device for safety goggles, safety helmets or safety masks, which has an electrooptic antiglare pane (5). <??>This antiglare pane (5) comprises a liquid crystal cell (15) which is controlled by an electronic circuit for setting the optical transmission. The operating voltage is selected in such a way that the optical transmission value of the antiglare pane (5) is less than 1%. The frequency of this operating voltage is below 32 Hertz. <IMAGE>
