Abstract (en)  
[origin: EP0550392A1] The invention relates to a dry-cleaning plant (1) for the cleaning of various articles by means of solvents or other liquid products, of the type comprising in series, as its cleaning circuit, a tank (2) for the containing of the dry-cleaning liquid, a cleaning drum (8), a circulation pump (20) of the said liquid and a filter (29) for the said liquid, further comprising in series a drying and return circuit of the cleaning liquid, the said cleaning drum (8), a ventilator (30) for the liquid circulation and a condenser-separator system (33) connected to the drum (8) itself at the end of the said drying circuit, the said plant (1) further comprising a distillation apparatus (3), returningly connected to the said tank (2) and to a condensing device (15) for purifying the cleaning liquid, characterised by the fact that the said drum (8) is housed in a chamber (9) of the said distillation apparatus (3) and is externally heated by the distillation vapours. <IMAGE>
