Abstract (en)

[origin: EP0551041A1] The invention relates to a device for lighting and hanging at least one carrying body rod (9), characterised in that it comprises a base (1) which can be fixed against a wall (2) or a ceiling, and at least one first profile section constituting a cornice (3), with, in cross-section, a vertical portion (4) forming at the top a cavity (5) for attachment to the said base (1), and at the bottom a lip (6) for receiving one end (7) of a possible carrying body support (8), and for horizontal stabilisation by a couple exerted between the said base (1) and the said carrying body support (8), and a horizontally inclined portion (10), of concave shape towards the said top of the vertical portion (4), and provided with first electrical supply means for at least a first light source (38); a near end (13) of the said horizontally oriented portion (10) constitutes a vertical bearing surface for the said end (7) of the carrying body support (8). <IMAGE>
