Abstract (en)
[origin: FR2679785A1] A toy vehicle comprising a chassis (1), a pair of non-steerable wheels (2) and a pair of steerable wheels (3) mounted thereon, a reversible motor (4) mounted on said chassis and provided with a first output shaft (5) which is combined with a transmission (6) for driving at least one of the non-steerable wheels in a forward direction regardless of the direction of rotation of the motor, and a second output shaft (14) supporting at least one control tooth (15). The steerable wheels are mounted on supports (7) which are hinged to the chassis around substantially vertical axes (8) and connected by a linking bar (11), wherein a steering control pin (13) is mounted on the linking bar (11) and extends opposite and parallel to the second output shaft (14).
