Abstract (en)

[origin: EP0551787A1] This machine comprises a creel (3) for supplying a plurality of yarns (1a, 1b, 1c, 1d) and a lapping assembly (16) comprising essentially two superposed hollow spindles (8a, 8b). The yarns (1a, 1b, 1c, 1d) are intended for forming the core of the lapped yarn and are conveyed to the lapping assembly by means of a plurality of sliding tension regulators (5) arranged at the exit of the supply creel (3), a combining guide (12) for the elementary core yarns being arranged at the entrance of the first lapping spindle (8a). <IMAGE>
