Abstract (en)

A pneumatic controller for a dispenser for viscous materials has a pistol grip body (50) in which is mounted a trigger (52) which is operably connected with regulated pressure setting member (16) of a pressure regulator (10) by a pair of linkages (56 and 60) pivotally connected to the trigger and the body. As the trigger is depressed the plunger adjusts the regulated pressure setting. This allows the rate at which the viscous material is dispensed to be adjusted by the hand holding the pistol grip. <IMAGE>
