Abstract (en)

[origin: WO9205713A1] Disclosed are articles, such as smoke filters, which contain fibers that have complex geometry in combination with tobacco modifying agents such as flavorants. The fibers are preferably made of polyester such as poly(ethylene terephthalate) and preferably are capable of spontaneously transporting water or n-decane on their surfaces. The articles of the invention result in improved delivery of the tobacco modifying agent to the user.

Abstract (fr)

L'invention décrit des articles, tels que des filtres à cigarettes, contenant des fibres à géométrie complexe combinées à des agents de modification du tabac tels que des aromatisants. Les fibres sont constituées, de préférence, par du polyester tel que poly(éthylène téréphtalate) et, de préférence, peuvent transporter spontanément de l'eau ou du n-décane sur leurs surfaces. Les articles décrits par l'invention permettent d'améliorer la qualité de consommation du tabac modifié par lesdits agents en augmentant la durée du goût du produit.
