Abstract (en)

[origin: WO9206996A1] The present invention provides novel peptides of formula (I). These peptides are useful as inhibitors of retroviral proteases. Inhibitors of retroviral proteases, such as the HIV-I protease, are useful for treating diseases caused by retroviruses, such as human acquired immunodeficiency disease syndrome (AIDS).

Abstract (fr)

L'invention se rapporte à de nouveaux peptides représentés par la formule (I) et qui sont utiles comme inhibiteurs des protéases rétrovirales. Les inhibiteurs des protéases rétrovirales, comme la protéase du VIH-I, servent à traiter les maladies causées par les rétrovirus, telles que le syndrome immunodéficitaire acquis (SIDA) chez l'homme.
