Abstract (en)
[origin: WO9207001A1] The present invention relates to polyclonal and monoclonal antibodies which selectively bind to antigens associated with hepatitis C viral particles or HCV aggregated antigens isolated from infected patients and to processes which may be used to isolate hepatitis C virus from infected patients including a procedure by which HCV is partially purified. The use of these antibodies in diagnostic immunological assays is also described.

Abstract (fr)
L'invention concerne des anticorps polyclonaux et monoclonaux se liant sélectivement à des antigènes associés à des particules virales de l'hépatite C ou des antigènes agrégés sur le VHC isolés sur des patients contaminés, ainsi que des techniques pouvant être utilisées afin d'isoler le virus de l'hépatite C sur des patients contaminés comprenant un procédé selon lequel le VHC est partiellement purifié. L'invention concerne également l'emploi de ces anticorps dans des dosages immunologiques de diagnostic.
