Abstract (en)

To avoid changes in position of longitudinal sleepers (20), it is proposed that the sleeper (20) consists of at least two sections (22, 24) which are interconnected or merge into one another and which are movable relative to one another while preserving or substantially preserving the spacing between rails (1, 3; 2, 4) fastened on them. <IMAGE>

Abstract (de)

Zur Vermeidung von Lageveränderungen von Langschwellen (20) wird vorgeschlagen, daß die Schwelle (20) aus zumindest zwei miteinander verbundenen oder ineinander übergehenden Abschnitten (22, 24) besteht, die unter Beibehaltung oder im wesentlichen unter Beibehaltung des Abstandes zwischen auf diesen befestigten Schienen (1, 3; 2, 4) relativ zueinander bewegbar sind. <IMAGE>
