Abstract (en)  
[origin: EP0552972A1] A unit of catering or other equipment comprising a body carried on a plurality of legs (17), each of which is provided with a ground support member, certain of the ground support members comprising rotary translational elements (20) and the remainder being flat (18), such that in a first, locked state, in which all the ground support members (18,20) are in contact with the ground, the unit is fixed in position, whilst in a second, free state, in which the flat ground support members (18) are raised above ground level, the unit's location can be changed wherein at least one of the legs (17) provided with a rotary translational element (20) is extendable, extension thereof causing the unit's state to change from locked to free. The unit may form part of a catering facility (2), and a dedicated fluid storage tank (68) may be provided, mounted to the unit, which is releasably connected to the mains water supply. <IMAGE>
