Abstract (en)  
[origin: EP0553027A1] According to the invention, the said inflatable cushion includes: - an outer peripheral edge (101) adapted to the shape and to the dimension of a packaging receptacle, - at least one inner opening (102, 102') suitable for receiving at least one object to be packaged, - a plurality of notches (103, 103') extending from each inner opening towards the peripheral edge, the said notches limiting, in pairs, wedging parts (104, 105, 106, 107, 104', 105', 106', 107') suitable for coming into contact with the object, preferred pivoting zones (108) of the wedging parts being defined between the said notches and the peripheral edge, the said wedging parts being capable of pivoting at the time of inflation about preferred pivoting zones in order to vary the size and/or the shape of each inner opening and to adapt it to objects of different sizes while still exerting a holding pressure on the object or objects. Application to the packaging of objects of different sizes and/or shapes. <IMAGE>
