Abstract (en)

[origin: WO9206607A1] The present invention relates to a method for manufacturing moulded footwear to a desired width, the method comprising the steps of moulding the structure of a footwear having an upper portion, a lower portion and a sole with a thermoplastic material; of providing the sole of the footwear with a weakened area so as to allow some lateral displacement of the lower portion and finally, of forcing the lower portion of said footwear over a width adjusting means to adjust the lower portion of the moulded footwear to said desired width.
