Abstract (en)

[origin: EP0553432A1] An installation for supplying media to a blowing lance is described, especially a blowing lance in steel manufacture by the top-blowing process. A vertically displaceable lance carrier (6) comprises a media connection device (8) with a vertical connection surface. Before coupling on, the blowing lance (4) is first locked on the lance carrier (6) by means of a fixing device (10). The connection device (8) is horizontally displaceable in guide rails (28, 30) of the lance carrier from a waiting position towards the coupling head (20) of the blowing lance (4). <IMAGE>
