Abstract (en)

[origin: EP0553462A1] The invention relates to support connections between two rolls (1, 2), the shell (13, 15) of at least one roll (1, 2) being displaceable along a pressure plane and the support parts (5, 6) which respectively hold one end of the carrier (14, 16) being positively connected via at least one elongate connecting part (7) which runs along the pressure plane, has thickened portions (8) at both ends and is accommodated in corresponding cutouts (9) in the support parts (5, 6) in a manner such that it can be removed. The invention is intended to make possible a quick change of rolls, felts or cloths, and a compact construction. <IMAGE>
