Abstract (en)

[origin: EP0554478A1] A box-type terminal (1), especially for installation apparatuses, for example line protection circuit breakers, which guides a terminal screw (3) in a frame-like terminal body (2) and holds a multi-limbed compression piece (4) one of whose limbs, as a compression limb (5), forms the actual compression piece between the terminal screw (3) and the terminal body (2). It is provided that, on a limb (6) which is opposite the compression limb (5), the compression piece (4) has a snap-action holder (7) for the terminal screw (3) and a compression spring (8) for the terminal body (2). <IMAGE>
