Abstract (en)
[origin: EP0554628A1] The present invention relates to an assembly of finished products stacked on a pallet and to the method for making such an assembly. The assembly consisting of finished products stacked on a pallet (1) and encased in order to form a delivery and transportation unit is characterised in that a cutting wire (6) is fastened to the pallet or to another location of the assembly on the one hand and, on the other hand, in a removable manner, at a distant point, the assembly being hoop-cased in the manner of a helix by means of an extendible (stretchable) film.
