Abstract (en)

[origin: WO9207930A1] Enzymatic detergents containing fatty alkyl sulphate and soap are more strongly stabilised by glycerine than by 1,2 propane diol. The soap consists of a mixture of salts of ethylenically unsaturated C12? to C18?-fatty acids and saturated C12? ot C18?-fatty acids in a proportion by weight of 3:1 to 1:3.

Abstract (fr)

On stabilise plus fortement des détergents enzymatiques liquides contenant du sulfate d'alkyle gras et du savon en utilisant de la glycérine plutôt que du 1,2-propandiol. Le savon se compose d'un mélange de sels d'acides gras C12-C18 éthyléniquement insaturés et d'acides gras C12-C18 saturés dans un rapport en poids compris entre 3:1 et 1:3.
