Abstract (en)
[origin: WO9207564A2] A calcium antagonist especially nimodipine, is used for the treatment of demyelinating diseases such as multiple sclerosis. It may be used in combination with an antiviral compound which is active against retroviruses, such as azidothymidine.

Abstract (fr)
Antagoniste calcique, notamment la nimodipine, servant au traitement des maladies démyélinisantes telles que la sclérose en plaques, et pouvant s'associer à un composé antiviral, par exemple l'azidothymidine, dont l'activité est dirigée contre les rétrovirus.
