Abstract (en)

A stake setting device for positioning, in order to mortar them, stakes, posts and the like, to fit with fencing walls, plinths and the like, comprises a tripodal body (1), having a substantially bridge-like structure, including two shiftably and fixably coupled sections (1', 1''), whereby to provide a bridge, with two legs (111, 111') on one side and one leg (111'') on the other side, wherein on the beam (11'') of the bridge (1), is mounted, in a sticking out condition, shiftable in both orthogonal directions, a horse shoe-like screw clamp (2) which is cardan-like articulated, to receive, in the middle, the stake or post (0) to be set. A loop-like arrangement (9) including a pin (9'), is adapted to engage a conventional bottom hole (09) of each post (0). <IMAGE>
