Abstract (en)

[origin: EP0555725A1] In a mounting device for hot gas or expansion nozzles for the connection of air blasting apparatus in order to eliminate banking of material, the nozzle can be arranged in a through-opening (5) in the wall (6) of the reaction chamber. For the purpose of simple mounting and demounting of the nozzle constituting a closure part, a swap body (1) is provided, in which the nozzle (2) is received in an exchangeable manner. Fitted from the outside onto the swap body (1) is a front panel (3) which serves for the connection of the air blasting apparatus. <IMAGE>
