Abstract (en)  
A rack having take-out baskets or similar display/take-out containers for merchandise in a retail business, in particular a self-service shop, in which at least one basket (1) has an inclined bottom (3) and the merchandise items (24) present in the basket (1) are accessible at the side facing the consumer, the basket being movable along laterally arranged rails (8,9) between an upper position located against the rear wall and between mounting columns (2) of a rack, and a bottom filling position located in front of the rack, each rail having mounted thereon a rotatably journaled rod (14), connected to the basket, wherein the rod and the rails comprise stopping means and the stopping means can be caused, by rotation of the rod, to cooperate with the stopping means (15,17) of the rails for defining at any rate the upper and lower positions, respectively, of the basket, and the assembly of rails and rod, and optionally a tension spring (20), is accommodated in a space below an inclined wall forming a transition between the bottom and a side wall. <IMAGE>
