Abstract (en)

[origin: WO9208672A1] A method for producing a powder of mixed metal oxides, wherein a metal hydroxide, a metal alcoholate and water are mixed in a common organic solvent containing a dissolved organic salt. The method is suitable for the production of barium titanate powders doped with metal oxides and intended for the manufacture of electronic components.

Abstract (fr)

Procédé de fabrication d'une poudre d'oxydes métalliques mixtes, selon lequel on mélange un hydroxyde métallique, un alcoolate métallique et de l'eau dans un solvant organique commun, contenant un sel organique dissous. Le procédé convient pour la fabrication de poudres de titanate de baryum dopé par des oxydes métalliques, destinées à la fabrication de composants électroniques.
