Abstract (en)  
A cover/wrap system for flower pots 10 and the like allows the use of any sheet 14 of material to cover a pot and be held in place by a sleeve 16. A transparent sleeve can be used, and colored or patterned material will decorate the pot; and, if the material is subject to moisture damage, an inner sleeve 32 acts as a moisture barrier. The sleeve can be set down, the sheet of material placed over the sleeve, and the pot simply placed on the sheet of material. The pot will sink into the sleeve and will urge the sheet of material around the pot, then hold the material in place. <IMAGE>
