Abstract (en)
[origin: EP0556473A1] The side windows (23,25) and/or the upper window (15) of the weighing space (3) of a precision balance (1) are divided into window sections (27,29) and (43,45,47). The individual window sections (43,45,47 and 27,29) are guided longitudinally in guide grooves (35,37 and 49,51,53) lying parallel and next to one another. Fastened to the edges of the window sections (43,45,47; 27,29) are drivers which, when an upper window section (43) is displaced, drive the section (45) located below it. <IMAGE>
