Abstract (en)

[origin: EP0557235A1] A mechanism for the connection of a pipe (9) to a node (1) of a three dimensional structure consists of a bolt (8), which bears a hole for the passing through of a pin (4), an intermediate part (3), a circular disc (7), a washer (5), and a spring (6). The mechanism is useful for the construction of buildings with extra aesthetic requirements. <IMAGE>
