Abstract (en)  
[origin: WO9208785A1] A morbillivirus, multiple sclerosis virus (MSV), is isolated from multiple sclerosis (MS) brain tissue. Antibodies which recognize or bind to MSV are used in diagnosis or treatment of MS. Serological diagnosis of MS comprises detection of circulating anti-MSV antibodies. Compositions and methods for producing an immune response against MS are also disclosed.

Abstract (fr)  
Dans la présente invention, on isole un virus morbillieux, le virus de la sclérose en plaques (VSP), à partir de tissus cérébraux atteints de sclérose en plaques (SP). Des anticorps qui reconnaissent le virus VSP ou qui se lient au virus VSP sont utilisés dans le diagnostic ou le traitement de la SP. Un diagnostic sérologique de la SP consiste à détecter la présence d'anticorps anti-VSP en circulation dans le sérum du patient. Des compositions et des procédés servant à produire une réaction immunitaire contre la SP sont également décrits.
