Abstract (en)

[origin: FR2681363A1] Prefabricated members are provided for forming sports infrastructures by defining playing areas for team sports, wherein said members mainly comprise side barriers (11 and 12) and end barriers (13). Each end barrier (13) consists of a gantry (14) in which a goalmouth is provided. The gantries (14) are self-supporting and stable and require no ground anchorage. The side barriers (13) comprise a metal frame with one or more cover panels fastened thereto. Some of the side barriers may comprise a horizontal supporting bar arranged parallel to the barrier, or posts (7, 8) for holding a net (9).
