Abstract (en)

[origin: EP0557859A1] 2.1 Photographic images which were produced by means of so-called dry silver material are not sufficiently stable on storage. 2.2 Hexamethylenetetramine and related compounds are simple, cheap and effective stabilisers for the developed image, if they are added to the light-sensitive layer or to an auxiliary layer. 2.3 Production of photographic images, for example by contact printing, projection and camera exposure.
