Abstract (en)

[origin: EP0558018A1] The invention relates to a refractory ceramic prefabricated element for vertical installation in a tundish, with a gastight frame matched to the vertical internal cross-section of the tundish and having a central opening 12, with a gas feed line 16 extending along one frame section 10c, 10a and emerging with its gas-outlet end into a bubbler element 14 which is gas-permeable at least in the direction of the central opening 12 and is arranged between the vertical parts 10c, 10d of the frame 10. <IMAGE>
