Abstract (en)

A container, obtained by the folding and gluing of components of a single flat blank of cardboard material or the like, comprises one or more parallel and modular rows of cells capable of housing and supporting in a sprung manner substantially fragile products, in particular eggs, which container can also be used in conjunction with an identical structure having the function of a lid for packing of said products for transport, sale or conservation, or can be used as it is to form a display unit for said products, for example chocolate eggs or the like. <IMAGE>
