Abstract (en)

[origin: WO9209361A1] In a device for mixing, homogenising or reacting at least two especially fluid or pourable components with a container (1) arranged to rotate about a spindle, with at least one closable aperture (10, 11, 12, 14) for filling and/or emptying the container, the container (1) consists of at least two separately operable lengths of pipe (2) releasably connected together. In addition, the ends (5) of the lengths of pipe facing each other are fitted so as to seal, the axially external ends of the container (1) each have a sealing front wall (7) and at least one sealing wall (7) is movable in the axial direction of the pipe lengths (2).
