Abstract (en)

[origin: WO9306281A1] At least one stream of conditioned air is generated at a distance from the warp of each mechanical weaving loom and is directed against said warp. The conditioned air is conveyed to the warp threads by a descending stream that acts like a piston.

Abstract (fr)

Au moins un courant d'air climatisé est généré à une certaine distance de la chaîne tissée par chaque métier mécanique et dirigé sur celle-ci. L'air climatisé est transporté jusqu'aux fils de chaîne par un courant de refoulement descendant agissant à la manière d'un piston.
