Abstract (en)

The launcher of the invention comprises, on the one hand, an ammunition launching tube (4) with a spring-type energy accumulator, launching the ammunition vertically, and, on the other hand, an aiming device (24) carried by the firer. When the ammunition has reached its highest point, boosters cause it to rotate about its centre of gravity in the direction of the target, and a self-propulsion system is ignited. <IMAGE>

Abstract (fr)

Le lanceur de l'invention comporte d'une part un tube lanceur de munitions (4) à accumulateur d'énergie à ressort, lançant la munition verticalement, et d'autre part un dispositif de visée (24) porté par le tireur. La munition ayant atteint son apogée, des impulseurs la font tourner autour de son centre de gravité en direction de la cible, et un système autopropulseur est mis à feu. <IMAGE>
