Abstract (en)  
[origin: WO9209679A1] The invention provides a shaped solid, three-dimensional skeleton structure comprising: a relatively rigid, interlocking mesh of neutralized crystalline carboxylic acid. In another respect, the present invention provides an improved cleansing bar which is comprised of the rigid, interlocking mesh of neutralized carboxylic acid, preferably sodium soap fibers. Such preferred cleansing bars can be formulated to have essentially no bar smear. Some cleansing bars comprise surprisingly large amounts of water and another liquids while maintaining their rigidity and excellent smear properties; even when allowed to soak overnight in water.

Abstract (fr)  
Solide façonné présentant une structure de squelette tridimensionnelle comprenant une maille relativement rigide à emboîtements d'acide carboxylique cristallin neutralisé. La présente invention se rapporte également à une barre détergente comprenant la maille rigide à emboîtements d'acide carboxylique neutralisé, de préférence en fibres de savon de sodium. On peut formuler ces barres détergentes afin qu'elles ne présentent pratiquement pas de manque de consistance superficielle. Certaines barres détergentes contiennent des quantités étonnamment élevées d'eau et d'autres liquides, et conservent leur rigidité et d'excellentes propriétés de consistance superficielle même après avoir trempé dans l'eau pendant toute une nuit.
