Abstract (en)

[origin: US5292198A] A pull-out guide fitting for a drawer includes a drawer-side pull-out rail and a furniture carcass-side support rail, and possibly a middle rail disposed between the pull-out rail and the support rail. The support rail is mounted by support structure or coupling members on a support bracket that in turn is mounted on a carcass side panel. At the rear of the support bracket is a hook under which the support rail is insertable. The support rail is held in the inserted position by a locking lever that is supported on or in the support rail. The locking lever is acted upon by a spring to pivot to a locked position abutting against a detent edge of the support bracket.
