Abstract (en)

[origin: WO9210435A1] The invention relates to a method of controlling fibre generation in a process where mineral melt is thrown into fibres with the aid of a centrifugal force. With this method, controlled vibrations are caused in the spinning wheel.

Abstract (fr)

L'invention se rapporte à un procédé de commande de la fabrication de fibres par transformation d'une masse minérale fondue en fibres à l'aide d'une force centrifuge. Dans ce procédé, on applique des vibrations contrôlées aux roues du dispositif de fibrage.
