Abstract (en)

An alloy racket frame has a head (1) with two ends (11), a shaft (3) and a handle. A slim foam portion (20) surrounded by a number of first adhesive layers (21) fit in the two ends of the head. The two ends of the head and an end of the shaft are surrounded by a number of second adhesive layers (22). The racket is heated and compressed so as to simultaneously cure the first and second adhesive layers, so that the head is securely joined with the shaft. <IMAGE>
