Abstract (en)

[origin: US5328056A] The invention relates to a tube (1) having a neck (2) with a distribution orifice (3). The neck (2) being followed by a shoulder (4) and a flexible skirt (5) and, above the skirt (5). The neck (2) has an external, annular, tight fixing element (10, 30) for an external neck (27) by engagement and in that neck (2) which comprises two chambers (6, 7). The chambers are tight with respect to one another up to the distribution orifice (3). The first (6) communicating with the interior (8) of the skirt (5) of the tube (1) and the second (7) carrying through side window or windows (9). The invention also relates to the distributor obtained by engaging an external tube on the tube. It is used for the storage and distribution, without prior contact, of pairs of products in the pharmaceutical, cosmetic, food or cleaning industries.
