Abstract (en)

[origin: WO9307242A1] Certain borated aromatic polyols, such as catechol borate, are found to be effective lube oil additives to compatibilize the oil with the fluorocarbon polymer seals when the lube oil contains basic nitrogen.

Abstract (fr)

On a découvert que certains polyols aromatiques boratés tels que du borate de pyrocatechine peuvent servir d'additifs efficaces pour l'huile de graissage afin que cette dernière soit compatible avec les joints d'étanchéité constitués d'un polymère au fluorocarbone, lorsque ladite huile de graissage contient de l'azote basique.
