Abstract (en)

[origin: US5408930A] Device for selectively cleaning a plurality of cylinders of a sheet-fed printing press includes a washing device having equipment forming a cleaning surface, and a mutual pressure device for selectively bringing the cleaning surface into contact with one of the cylinders along a line of contact of the cleaning surface and the one cylinder extending parallel to a longitudinal axis of the one cylinder, and drive device for moving the cleaning surface so as to vary the position of the contact line with respect to the cleaning surface.
